

BRYAN DEBNAM

Lewisville, TX · bdebnam@gmail.com · linkedin.com/in/bryanhd

PROFESSIONAL SUMMARY

Systems Architect with 20+ years of IT experience and 3 years at the enterprise architecture level, spanning cloud migrations, M&A technology integration, and identity modernization across four acquisitions. Led design and deployment of a provider-agnostic Agentic AI orchestration platform and manages the GitHub Enterprise Copilot rollout. Postgraduate qualification in AI/ML Business Applications; AWS AI Practitioner and Solutions Architect certified.

PROFESSIONAL EXPERIENCE

Inform Diagnostics, A Fulgent Genetics Company — Coppell / Irving, TX · Dec 2015 - Present

System Architect · Apr 2022 – Present

- Led enterprise M&A technology integration for four acquisitions — architecting Microsoft 365 tenant consolidation and Active Directory / Entra ID identity integration for ~1,800 active users; migrated 400+ mailboxes/OneDrive accounts and validated multi-forest AD trust across 6 forests.
- Architected “Script Portal,” an internal platform for deploying interchangeable Agentic AI backends (Claude Code CLI, Copilot GPT CLI, custom VS Code Agent Bridge extension) under a shared allowlist and output-masking safety model.
- Designed and deployed Playwright-driven RPA agents for SOX evidence gathering — agents log into authenticated enterprise portals, make record-selection decisions, and capture timestamped, masked evidence into the correct control package.
- Manage the organization’s GitHub Enterprise Copilot deployment and built an n8n workflow to monitor seat utilization — reclaimed 25 inactive seats, saving ~\$475-\$725/month.

Senior System Engineer · Dec 2015 – Apr 2022

- Built and led the SOX/ITGC compliance program covering 60+ control activities (privileged access reviews, service account governance, PowerShell-automated evidence generation); primary liaison between Infrastructure, Security, and Audit.
- Directed cloud and on-prem infrastructure modernization — Azure Resource Manager automation, hybrid VMware/ Hyper-V, and monitoring expansion.
- Delivered core Windows Server, VMware, and datacenter operations across lab and corporate sites; recognized with the company’s ABCD Award (2016) for outstanding performance.

Microsoft Corporation

Support Escalation Engineer · Jan 2014 – Jan 2015

- Delivered escalation-level technical support for Premier customers in the Hybrid Cloud Identity space; contributed to a 2014 hackathon project that placed 25th worldwide and was awarded a U.S. patent.

Southwest Securities

Systems Administrator (NOC / Desktop Support / Sys Admin) · Jan 2000 – Jan 2014

- Advanced through progressively senior roles over 14 years, building a ground-up foundation in enterprise IT operations and Windows Server infrastructure.

EDUCATION

- **Texas McCombs** — Postgraduate Program, AI & ML Business Applications · 2025
- **Dallas College** — AAS, Network Administration · 2014

CERTIFICATIONS

- **AWS** — Certified Solutions Architect – Associate · 2026 | AI Practitioner · 2025 | ML – Practitioner
- **Microsoft** — Certified: Azure Administrator Associate & Azure Solutions Architect Expert · renewed 2026

SKILLS

Agentic AI & Automation: Claude, GitHub Copilot & Enterprise Copilot administration, Ollama, multi-agent orchestration (Flowise), agent governance & guardrail evaluation, LLM API brokering, VS Code Extension API, Playwright RPA, n8n, RAG

AWS & Azure Architecture: Azure Landing Zones, Azure/AWS Well-Architected Frameworks, multi-subscription/ multi-account governance, reference architecture design, cloud cost optimization

Identity, M&A & Migration: Active Directory trust & multi-forest design, Entra ID / AAD Connect, Microsoft 365 tenant migrations (BitTitan/MigrationWiz), SOX/ITGC compliance & audit evidence automation

Cloud, Automation & Platforms: Azure Resource Manager, PowerShell automation, Azure DevOps (CI/CD, Boards, Repos), Infrastructure as Code, HashiCorp Vault, Prometheus/Grafana, Incus (LXD), VMware, Hyper-V, Windows Server, Linux, macOS
